168 responses

What do you think are the reasons that you do not use more eco-friendly products?

168 responses

Do you think you would buy more eco-friendly products if given a simple google chrome extension suggesting eco-friendly alternatives of the product you are looking for?

168 responses

What are your thoughts on sustainable living?

43 responses

Necessary for the sustainable life on the planet

Very necessary

It's okay...

Love it

*Few steps can led to a sustainable lifestyle like avoiding usage of plastic and look for other options.

*The fossil fuel usage should be reduced to minimum as possible as they are one of the main reasons of global warming and we should start using renewable sources as they cause less harm to environment

* Recycle and Reuse this will definitely help environment to some extent...eg recycling the paper 📄 will help us protecting trees and nowadays many other methods of paper manufacturing are introduced we should adopt those and keep our environment greener forever
